

Dynatrace Platform Deployment

Implements production-ready Dynatrace observability platform utilizing proven patterns from 15+ implementations. This service delivers a fully configured Dynatrace environment with comprehensive monitoring capabilities, automated operations, and integrated workflows for full-stack observability.

Prerequisites

- Completed Dynatrace readiness assessment
- Infrastructure provisioned per specifications
- Network access requirements met
- Security policies approved
- Application team engagement confirmed

Platform Foundation (4 weeks)

- Dynatrace tenant configuration
- OneAgent deployment framework
- Network access setup
- Security baseline implementation
- Integration framework deployment

Advanced Configuration (4 weeks)

- Auto-discovery rules setup
- Management zone configuration
- Custom metrics implementation
- Dashboard development
- Alerting framework setup

Optimization & Validation (4 weeks)

- Automation script development
- Integration testing
- Performance validation
- Production verification
- Operational handover

Technical Outcomes

- OneAgent deployment achieving comprehensive environment coverage
- Auto-discovery configured across target service landscape
- Alert noise reduced to optimized baseline
- Integration points fully validated across the platform
- Platform operations extensively automated

Deliverables

- As-built platform documentation
- Configuration repository
- Integration validation report
- Automation scripts package
- Operational runbooks
