## Monitoring

Solve your toughest IT management problem with our flexible monitoring solutions

## Who we are

Shadow-Soft is a systems integrator with a rich open source history. Our team of strategists and engineers help organizations navigate their technology journey with confidence.

Hundreds of customers rely on Shadow-Soft to solve business problems with solutions that span culture, process, and technology.

Founded in 2008 and headquartered in Atlanta, Georgia.

## Why Shadow-Soft?

### Rich Open Source and Integration Experience

Shadow-Soft was born out of the open source world. Our history and proven track record puts us in a great position to help organizations solve complex technology projects with confidence.

### Outcome-Based Methodology

Customers see us as a trusted advisor that provides ongoing, proactive guidance around competitive trends and industry best practices. Our team is continuously researching, evaluating, and presenting new ideas to customers that shake up the status quo.

### Shadow-Soft Academy

Academy trains and certifies recent graduates and transitioning IT professionals to solve the deficit of engineering talent in the marketplace. You'll find our talented graduates working at Shadow-Soft and other top organizations.

### Committed to the Community

We embrace open collaboration, contribution, and innovation. Our community events for IT practitioners offer a platform to learn and debate new ideas around culture, process, and technology.

## Our strategists and engineers

We hold over 80 certifications. Our engineers update their skill sets through rigorous certification courses and work experience.
