Shadow-Soft Infrastructure Monitoring Solutions

Key Benefits

- Monitor any infrastructure and application, anywhere.
- Actionable insight to solve your IT management problems
- Automate and scale infrastructure monitoring

Overview

Shadow-Soft's infrastructure monitoring solutions help to reduce the risk and uncertainty when designing, reviewing, and implementing a monitoring strategy. Our experienced and certified monitoring consultants can arm your organization with the processes and tools necessary to avoid common pitfalls.

Our team will help to design your monitoring architecture, assist with the setup, automation, and configuration, work with your team to implement core technologies, and enable your team with training, best practices, and knowledge transfer.

Consume our services in three ways:

Infrastructure Monitoring Workshop

- 3-5 day onsite or remote
- Tailored content designed to teach your team best practice architecture
- Walk away with a better foundational understanding around how monitoring can affect your business, what changes you have to consider in order to make the transition, and more about monitoring technologies
- Equip your team with the skills to begin a designing a monitoring strategy

Infrastructure Monitoring Assessment

- 2-3 week assessment reviews your existing infrastructure and monitoring practices
- Assess infrastructure architecture and integration within other tools
- Provide process improvement recommendations and architectural guidance
- Deliver assessment report detailing current environment, gap analysis of capabilities, recommendations for improvement, and provide an estimate for implementation time and tooling

Infrastructure Monitoring Quickstart

- 6+ week engagement to help you design an infrastructure monitoring architecture
- Onboarding, training, and knowledge sharing around monitoring fundamentals
- Review infrastructure and develop a monitoring strategy
- Build a core monitoring infrastructure
