

Shadow-Soft Kubernetes Solutions

Key Benefits

- Shorten application development cycles and deliver better quality software
- Focus on writing code and let Kubernetes platforms build, run, and scale your apps
- Increase portability and reduce costs with containerized apps in Kubernetes
- Automate and scale infrastructure

Overview

Shadow-Soft's Kubernetes solutions help to reduce the risk and uncertainty when designing, reviewing, and implementing a container infrastructure strategy. Our experienced and certified Kubernetes consultants can arm your organization with the processes and tools necessary to take advantage of the Kubernetes while avoiding common pitfalls.

Our team will help to design your Kubernetes architecture, assist with the setup, migration, and governance of your environment, work with your team to implement core technologies, and enable your team with training, best practices, and knowledge transfer.

Consume our services in three ways:

Kubernetes Workshop

- 3-5 day onsite or remote
- Tailored content designed to teach your team best practice Kubernetes & container infrastructure architecture
- Walk away with a better foundational understanding around how Kubernetes can affect your business, what changes you have to consider in order to make the transition, and more about container orchestration technologies
- Equip your team with the skills to begin designing a container infrastructure strategy right away

Kubernetes Assessment

- 2-3 week assessment reviews your existing applications, software developer lifecycle, and automation and security practices
- Assess application architecture and integration within existing tool chain
- Provide process improvement recommendations and architectural guidance
- Deliver assessment report detailing current environment, gap analysis of capabilities, recommendations for improvement, and provide an estimate for implementation time and tooling

Kubernetes Quickstart

- 6+ week engagement to help you design a Kubernetes architecture
- Onboarding, training, and knowledge sharing around Kubernetes fundamentals
- Review applications and develop an application migration strategy
- Assist with evaluating Kubernetes platforms and native solutions
- Migrate an application to Kubernetes

About Shadow-Soft

Shadow-Soft is a systems integrator with a rich open source history. Our team of strategists and engineers help organizations navigate their technology journey with confidence.
