

Shadow-Soft DevOps Solution

KEY BENEFITS

- Shorten application development cycles and deliver better quality software
- Focus on writing code and let your DevOps tool chain build, run, and scale your apps
- Automate and scale infrastructure

ABOUT SHADOW-SOFT

Shadow-Soft is a systems integrator with a rich open source history. Our team of strategists and engineers help organizations navigate their technology journey with confidence.

OVERVIEW

Shadow-Soft's DevOps solutions help to reduce the risk and uncertainty when designing, reviewing, and implementing DevOps, CI/CD and automation. Our experienced and certified DevOps consultants can arm your organization with the processes and tools necessary to take advantage of DevOps while avoiding common pitfalls.

Our team will evaluate both the current and desired state of your organization's DevOps progress and find the best path to achieve future goals. We will identify opportunities for continuous improvement by defining a baseline of where you are on your journey and the desired state of where you're trying to go.

DEVOPS ASSESSMENT

- 2-3 weeks on-site or remote
- Perform discovery on pre-existing DevOps automation tools and processes
- Assess integration within your DevOps tool chain
- Conduct a configuration management product comparison presentation, including Puppet, Chef, and Ansible
- Deliver assessment report detailing current environment, gap analysis of capabilities, recommendations for improvement, and provide an estimate for implementation time and tooling
